PROFESSIONAL SUMMARY

Full-Stack Developer and B.E. Robotics & Automation graduate with hands-on experience building and deploying MERN stack web applications. Proficient in React.js, Node.js, Express.js, MongoDB, and REST API development. Experienced in AI/ML API integration (Groq LLaMA 3.3-70B), JWT authentication, ETL pipeline development, and deploying scalable applications on cloud platforms (Vercel, Render, MongoDB Atlas, BigQuery).

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, Java, SQL, C
Frontend: React.js, Tailwind CSS, HTML5, CSS3, Vite
Backend: Node.js, Express.js, REST API Design, JWT Authentication
Databases: MongoDB, Mongoose, MongoDB Atlas, BigQuery (Google Cloud)
AI/ML: Groq API (LLaMA 3.3-70B), Cloudinary (PDF/Image Processing)
DevOps/Cloud: Git, GitHub, Vercel, Render, Google Cloud Platform, CI/CD
Concepts: OOP, Data Structures & Algorithms, MVC Architecture, CORS, Agile

EXPERIENCE

MERN Stack Intern — Suven Consultants & Technology Pvt. Ltd.

Sep 2024 – Oct 2024

- Built and deployed full-stack application modules using React, Node.js, Express, and MongoDB as part of a structured 4-week MERN internship program.
- Developed REST APIs with Express.js, performed CRUD operations with MongoDB, and implemented client-server communication patterns.
- Built reusable React components for frontend interfaces and integrated them with backend APIs.

PROJECTS

PrepWise AI | React.js, Node.js, Express.js, MongoDB, Groq API, Cloudinary, Vercel, Render

2025

- Architected and deployed a full-stack MERN application enabling job seekers to practice AI-driven mock interviews, analyze resumes for ATS scores, and track DSA problem-solving progress.
- Integrated Groq API (LLaMA 3.3-70B) to generate dynamic role-specific interview questions and real-time personalized feedback, reducing interview prep time by an estimated 50%.
- Implemented JWT authentication, role-based access control, Cloudinary PDF processing (ATS score 85/100), and Express rate limiting; deployed on Vercel + Render with MongoDB Atlas.

SupportIQ AI — Customer Support Analytics Platform | React.js, Node.js, MongoDB, Groq API, Vercel, Render

2026

- Built an AI-powered full-stack platform to analyze and triage customer support tickets using Groq's LLaMA 3.3-70B — automated sentiment analysis, category detection, and priority scoring via CSV bulk upload.
- Developed real-time analytics dashboard with Chart.js (pie, bar, doughnut, line charts) showing sentiment breakdown, category distribution, and 30-day ticket volume trends.
- Implemented search, filter, pagination, ticket detail view, CSV export, and JWT auth; deployed on Vercel and Render with MongoDB Atlas.

ETL + BigQuery Pipeline — Marketing Signal Dashboard | Python, SQL, BigQuery, Google Cloud, HTML

2026

- Built a production-grade ETL pipeline in Python to ingest weather data from the Open-Meteo API, transform it into a structured marketing signal dataset, and load it into Google BigQuery for analytics.
- Designed a full Marketing Signal Dashboard product brief with feature scoping, KPI definitions, and an interactive HTML wireframe prototype; authored SQL analytics queries for downstream reporting.

EDUCATION

B.E. in Robotics and Automation — Rajalakshmi Engineering College (Anna University)

Nov 2022 – May 2026

CGPA: 8.86 / 10.0 — Top 10% of class | Third Place, i'Quest'25 Department-Level Technical Competition

HSC (12th Grade) — Balalok Matric Higher Secondary School

Jan 2022

Scored 94.00% — Science stream
